NATIVE SEEDS FROM THE PACIFIC NORTHWEST -- 1936

Our seeds are all personally collected, fresh from this season's crop and carefully named. We earnestly endeavor to keep our botanical nomenclature correct and in accord with International Rules.

Because we have no control over the many factors involved, we cannot guarantee your success in germinating and growing our seeds. However, we are glad to send planting instructions and suggestions that may be of help to you.

Instructions for ordering

1. Kindly send remittance with your order unless you have established credit with us.

2. Foreign orders, except from botanical gardens or government institutions, will not be recognized unless accompanied by remittance in full, sent preferably by International Money Order.

3. We pay the postage on all seed orders.

4. Seeds sold at retail only.

5. Address all orders to
